

# WHAT'S NEW FROM **STUDER**<sup>®</sup>

An **evertz** brand

## Spatial IQ: Redefining the Mix

Spatial IQ is a context-aware mixing interface built to assist rectilinear sports production. One that replaces the traditional "faders in a row" model with an intuitive, spatial representation of your microphone coverage.

Simply put, Spatial IQ is doing for sports what automixers did for multi-speaker dialog a generation ago. It's an automixer that uses Location rather than Amplitude as the decision maker.

Once again, Studer enhances the job of the audio engineer. Spatial IQ frees them from chasing the game, and gives them the opportunity to simply mix it.

## VISTAVUE TOUCH

Is the perfect combination of Touch and Tactile. Your Console, Your Way!

A revolutionary interface built on the philosophy of modular freedom to satisfy the Audio, Video and Control desires of today. The interface unifies the Evertz VUE intelligent UI with classic Studer sound, incorporating tactile fader and Vistonics controls with high-resolution touch screens, as well as the option to add other physical panels and alternative layouts to meet today's changing production demands.

This architecture is intended to provide a scalable and adaptable control solution for current and future workflows, designed to bridge the gap between the user's imagination and the audience. An engineering masterclass that does not just work—it inspires.

## M23 Mic Rack

It is now also possible to experience the unmistakable soul of "The Studer Sound" in every environment. The latest addition to the Evertz family of products is the self-contained Studer M23. Not just a piece of gear; it's a gateway to audio excellence, designed to breathe life into your signal chain with the world's finest transformer-balanced microphone pre-amps.

Whether you require a beautiful analog warmth for the input stage of your DAW, the highest quality front end to share across any audio mixer or simply want to radiate your stunning microphone sources on to a Dante IP network or MAD1 streams, the Studer M23 delivers Legendary Audio to your mix. The Studer M23: Where Heritage is Now!
